

# How to catch Corona 19

The easiest way to catch Corona 19 is to ignore these 3 simple truths!

1. **BE SAFE.** If someone seems to be sick with flu like symptoms, Leave the area.
2. **DO YOUR MATH.** To become infected with Corona Virus you need to be exposed to 1000 viral particles.

	Emitted Viral Particles	Exposure time	The math
Near an infected person, no talking	20 VP /min	50 min	$20 \times 50 = 1000$ VP
Near an infected patient, with talking	200 VP / min	5 min	$200 \times 5 = 1000$ VP
Infected person coughs or sneezes	2 million VP / min	0 min	Use a mask or run away

- 3) **WEAR A MASK.** An infected person wearing a mask is good BUT if both persons wear a mask, you're really safe.

Be Well, Be Safe, Enjoy the weekend and the rest of your Summer!
